# Robot Chef

Designing and writing computer programs is a little bit like playing *Simon Says*. You must tell the computer, or device, every single step. In this challenge you must figure out the exact instructions to have the robot (or your teacher) make a sandwich. Your teacher will determine the ingredient—you determine the instructions.

Version 1

Write out each step.

_____

_____

_____

_____

_____

_____

_____

_____

_____

Version 2

Based on what you learned with version 1, rewrite the steps with any additions, changes, or removals.
